CULDROSE APP 134.050	MATZ	SFC-3000AGL
Culdrose	GL	0-2268

First of all let me start by welcoming our new users, fantastic choice in deciding to download RunwayHD! You will get an extra treat with this new version, we have added a special first time installation splash screen and tutorials so you can get to grips with RunwayHD.

For all our existing customers we have got some treats for you too! Introducing the new and improved flight logging functionality. Maximum and average speed will be shown in your flight logs along with location and altitude, all the important bits you want to view in your flight logs. We have given RunwayHD a little re vamp so you will notice the app icons have been changed throughout and we have upgraded the style of the route briefings.

We believe that sharing is caring so...there is now an even easier way to share you routes with your friends. Bluetooth sharing is available via the route tab and adds to the various other methods of route sharing that are already in RunwayHD.

If you fancy popping over to another country you need to make sure you have the essentials ticked off your list – GAR forms and Rocket Route filing. This version of RunwayHD will include an update of both of these processes so submitting them are easy peasy.

And of course various bug fixes, who could forget that one!

We hope you enjoy this version of RunwayHD – we think it's pretty awesome.
